Precision Catheter Cutting Machine With Punches

Präzi.Kat.S

Our pneumatic catheter cutting machines for multi-luminal catheter tubes are known for high precision, easy usability and reliability in industrial use.

The cutting machines are individually designed and built in accordance to the requirements of our customers. According to the requirements the components can be integrated on a base plate or in a production line with printing and cutting features, for example.

Extension to additional labor- and time-saving features like sensor trigger is possible at any time.
